The authors wish to apologize for incorrect table in the paper “Psychological Risk Factor of Postoperative Delirium in Patients with Gastrointestinal Cancer : Jikeikai Medical J. 2016 ; 63 : 37-43.”

In the Table 3, the result of Constipation score (EORTC QLQ-C30) in patients with postoperative delirium group is that  $47.0 \pm 77.0$  is incorrect. Correct result is  $29.4 \pm 23.2$ .
